KOTHRUD CENTRAL

DENTIST CLINIC

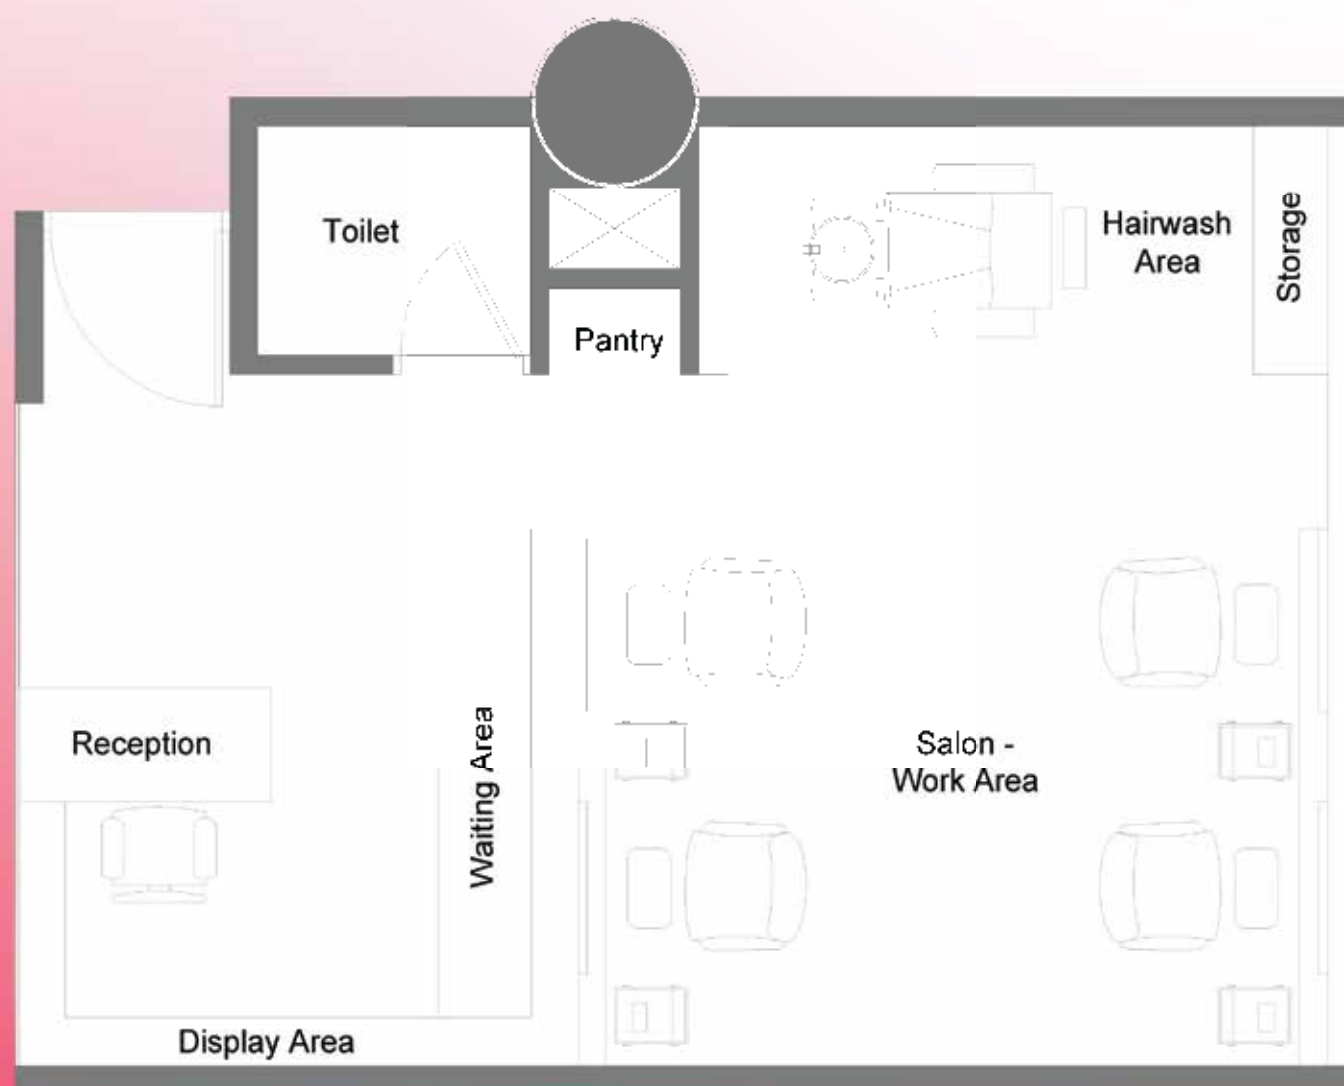

A well-planned clinic layout with a reception and waiting area for ample patients and a dentist's cabin suitable for one dental chair with assistant movement. Storage and support areas allow hygienic, organised, and efficient daily operations. Suitable for neighbourhood clinics and solo practitioners.

BEAUTY SALON

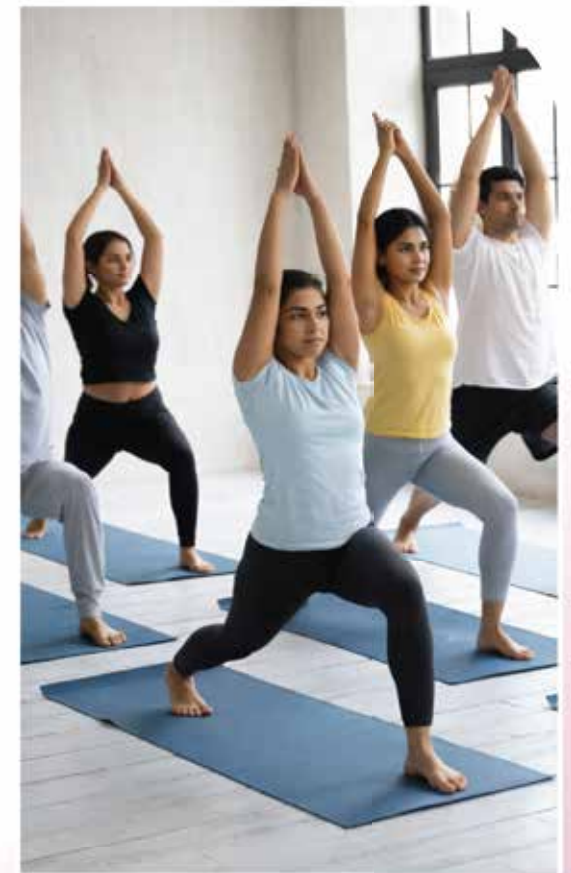

Set up your salon in a location surrounded by daily footfall. The space gives you room to accommodate styling chairs, a dedicated hair wash area, and waiting space for clients. Display and storage zones support smooth service delivery and retail activity.

YOGA STUDIO

Build a peaceful yoga studio in a well-connected area. The open layout supports group sessions, personal training, and meditation, creating a calm atmosphere for all. Moreover, it is ideal for participants per session, with seating for waiting members and storage for mats and accessories.

WELLNESS CENTRE

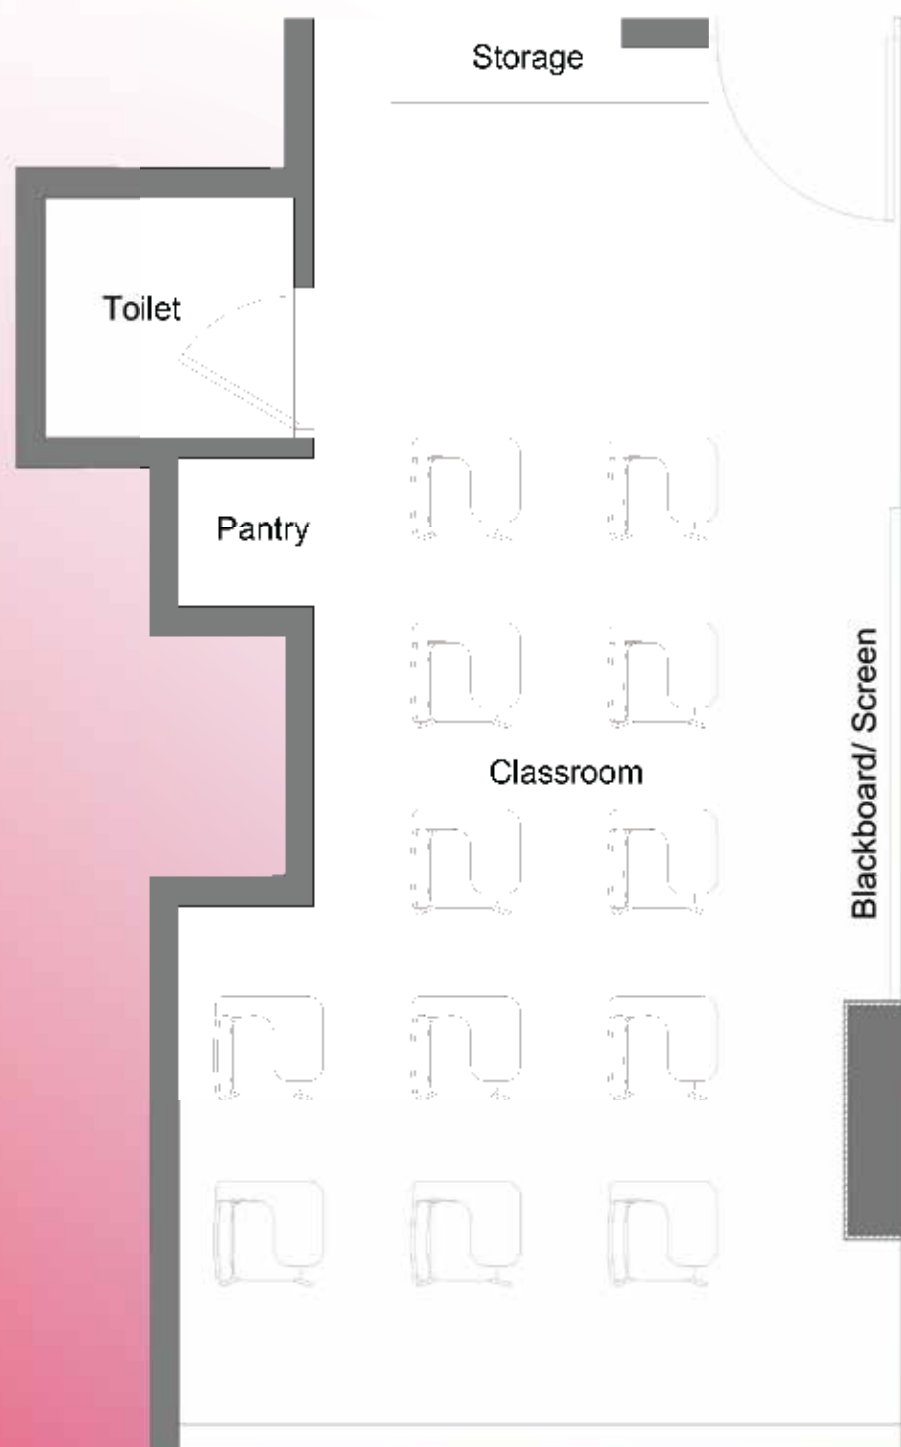

Create a private and professional space for counselling and therapy. The quiet and accessible setting offers space for waiting area, visitors and a counselling room suitable for 1-on-1 or family sessions. The layout supports privacy, comfort, and a calm consultation environment.

LEARNING CENTRE

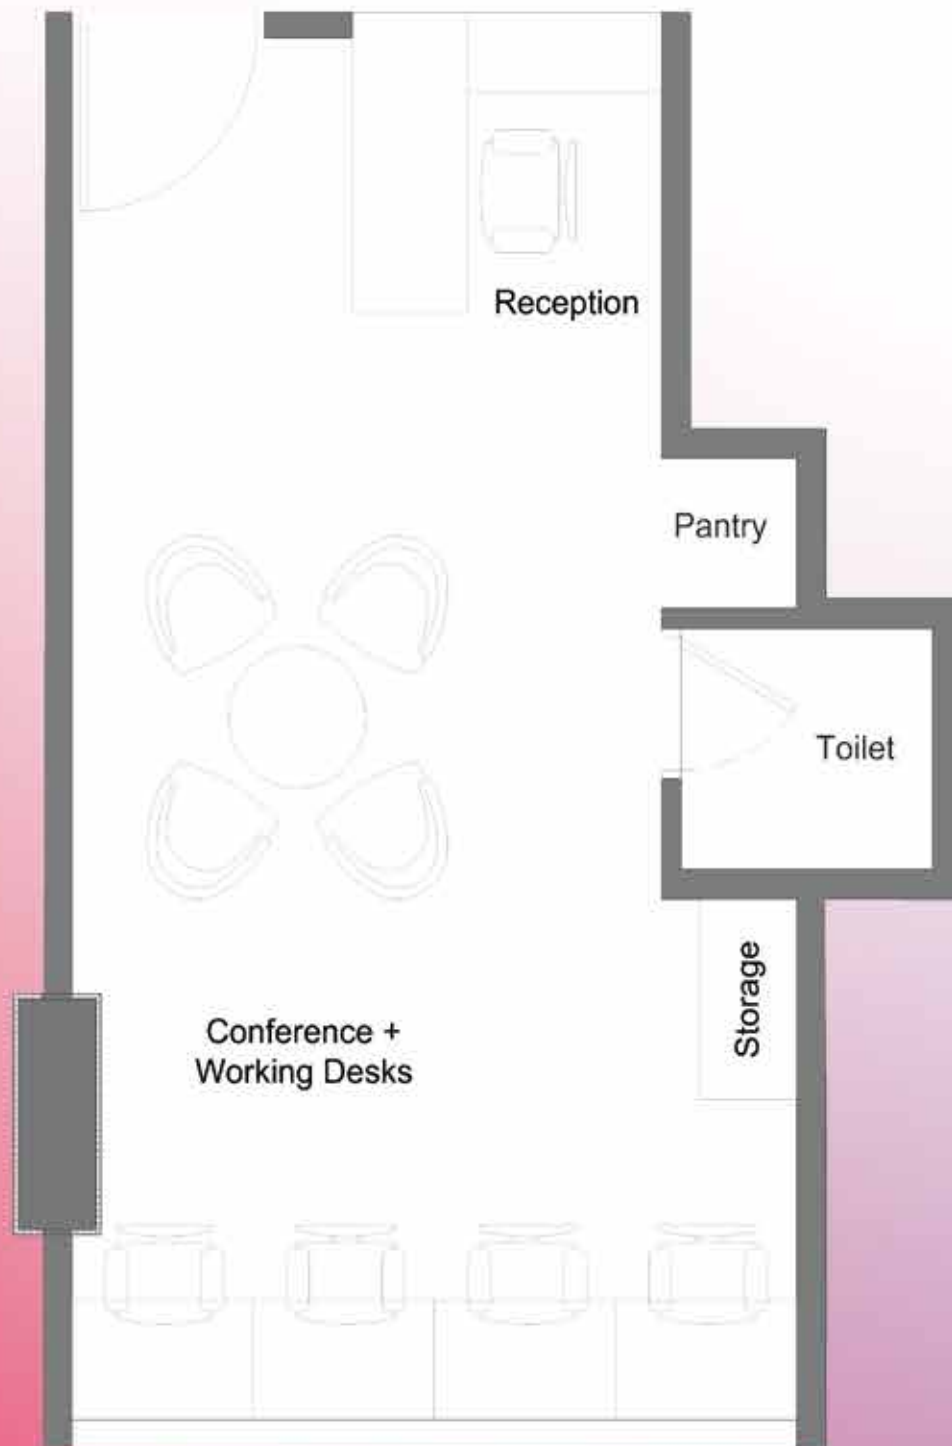

Start a learning hub in a neighbourhood full of students. The classroom offers space for ample students per batch, with clear teaching visibility and storage for learning materials. Suitable for tutoring, skill development, and training programs.

TRAVEL AGENCY

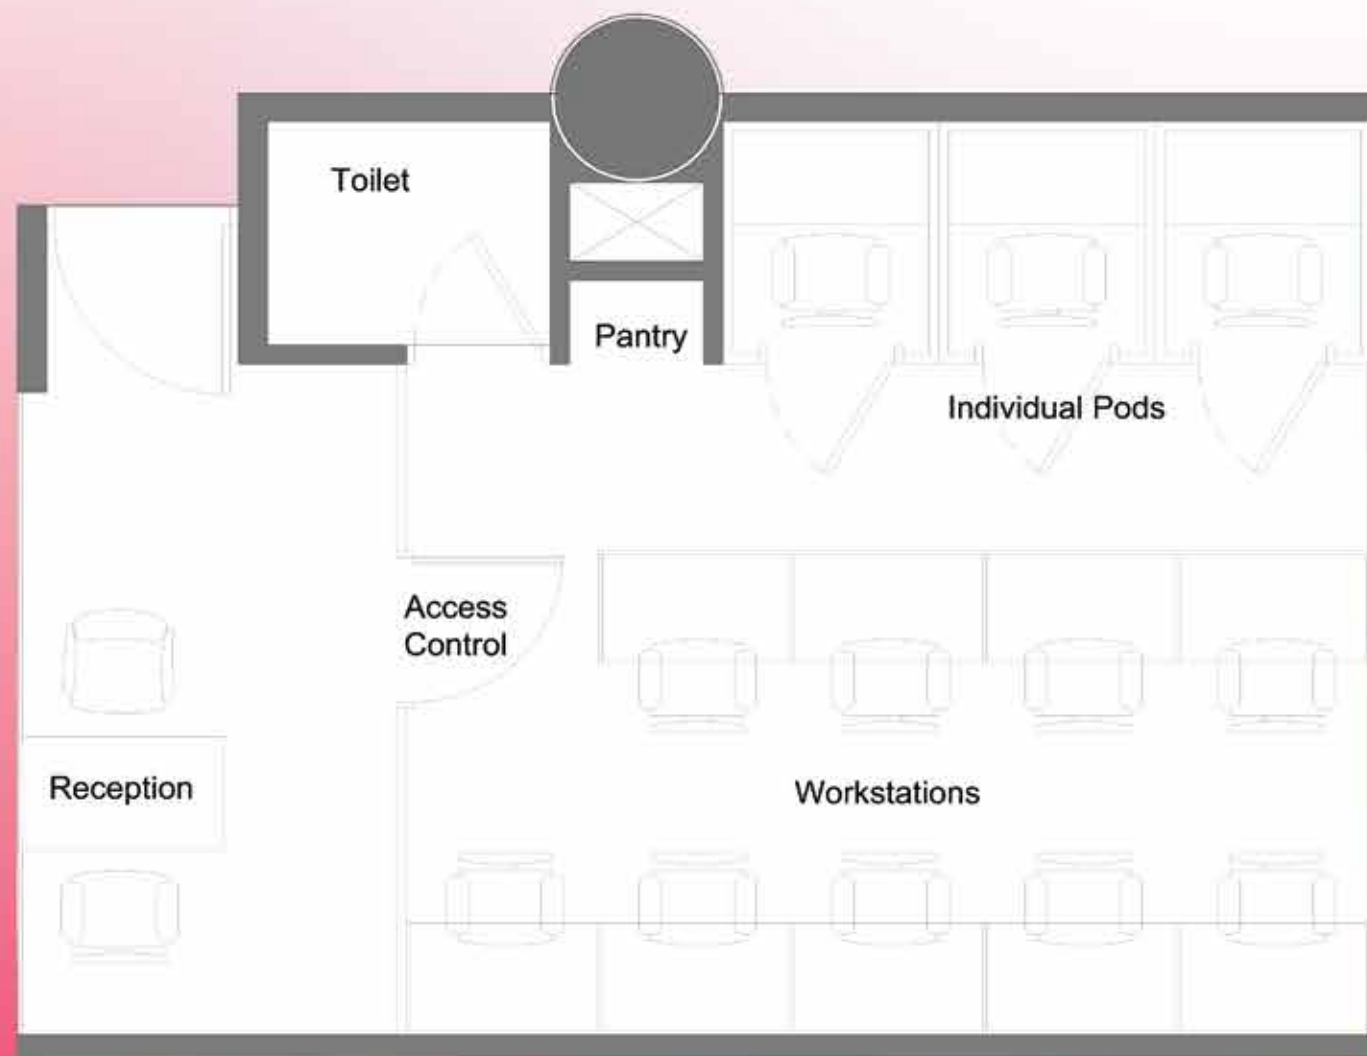

Open your travel office where customers can reach you easily. The space offers customer-facing office with seating for consultants and discussion space for multiple clients at a time.

CO-WORKING SPACE

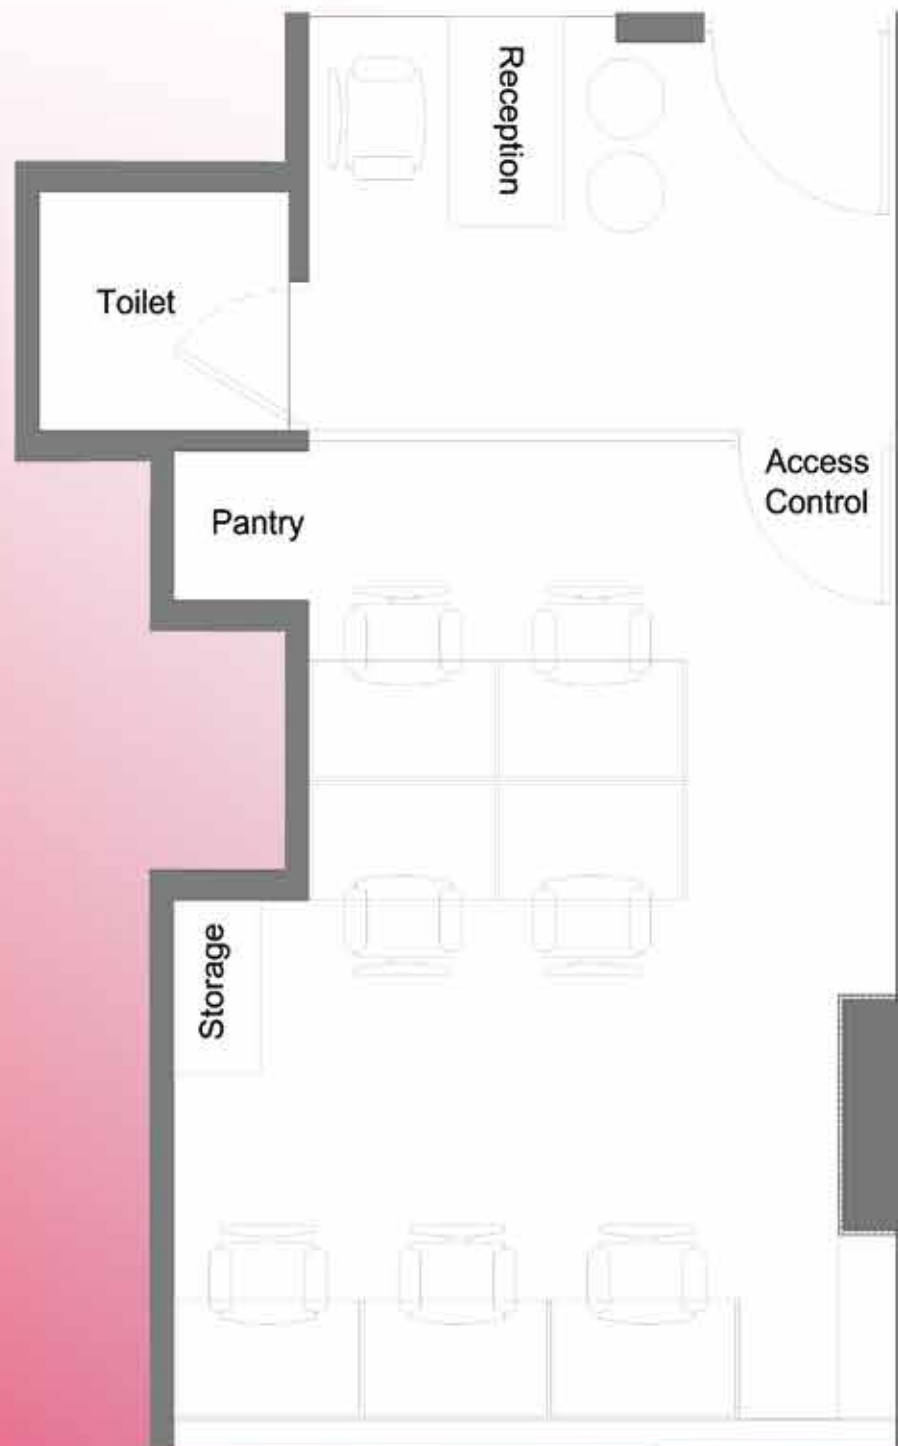

A compact shared workspace supporting workstations along with space for individual pods for focused work or calls. Suitable for freelancers, startups, and managed office operators.

CALL CENTRE

Build a call centre in a convenient location with good access. The layout offers space for workstations, for communication-driven and shift-based working environments with controlled access and support spaces.

CA OFFICE

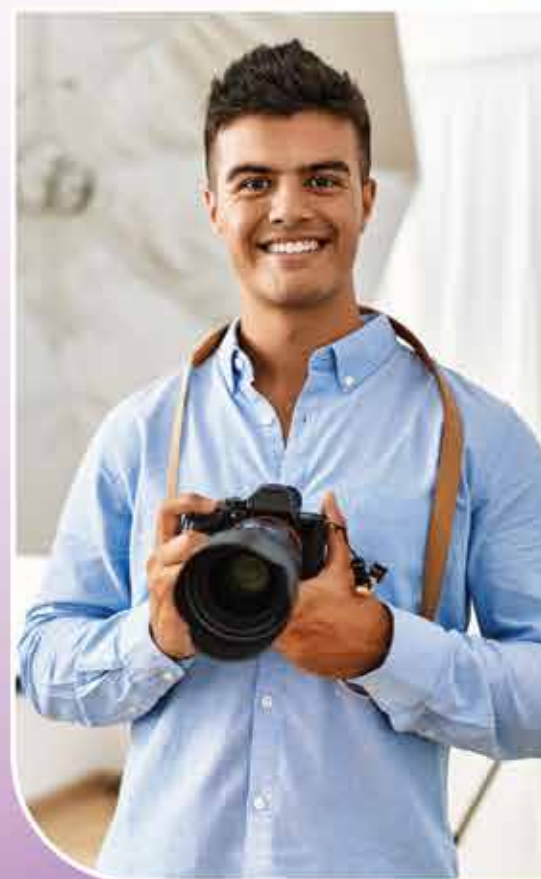

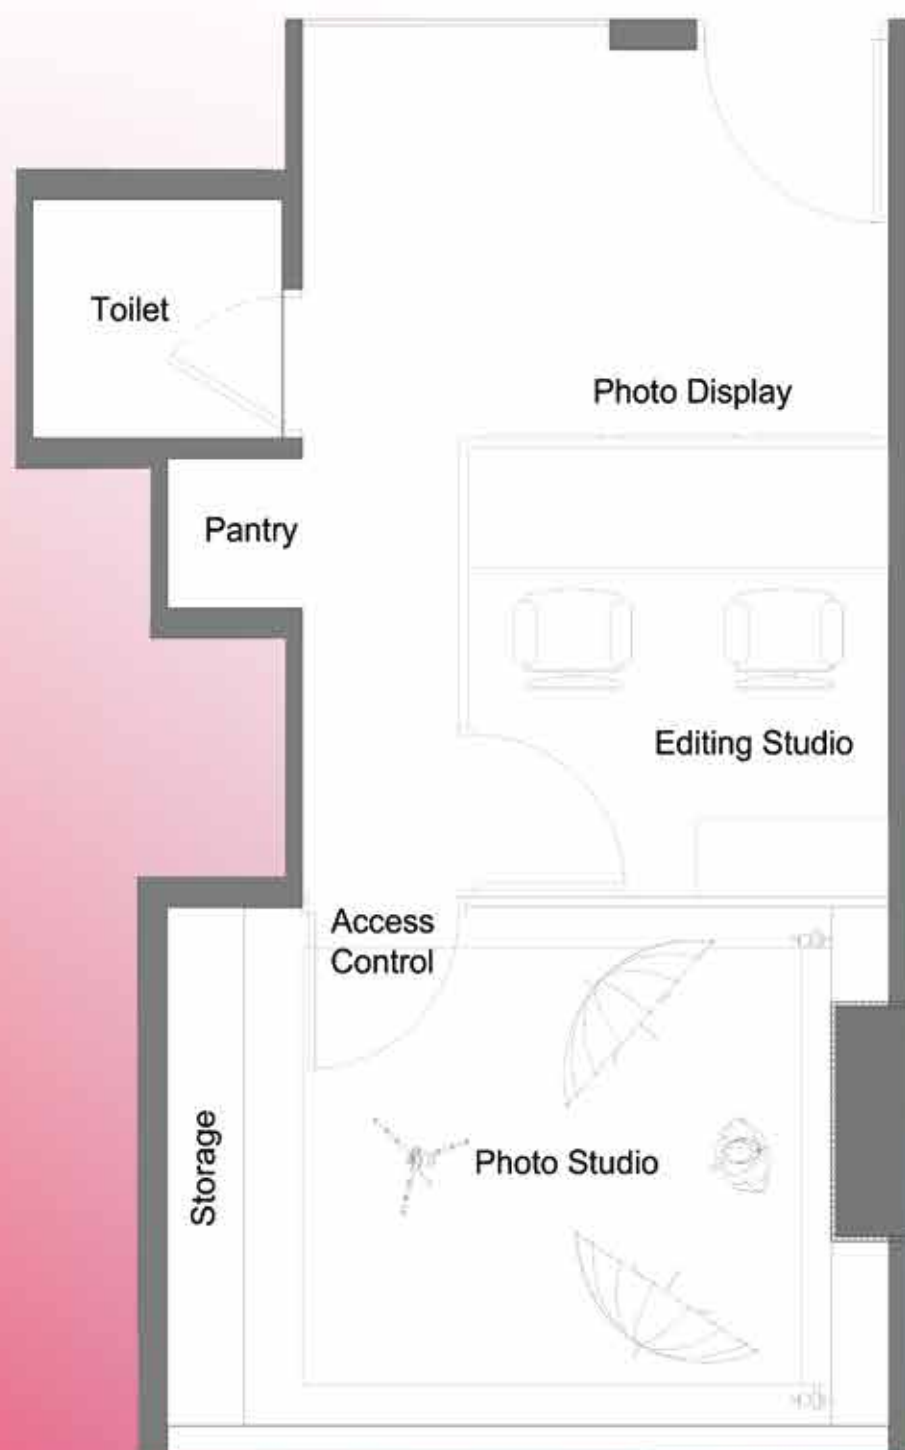

Create a professional office for audits, tax filing, and consultations. The layout allows room for files, client meetings along with space for working desks for team members, and a waiting area for clients.

PHOTO STUDIO

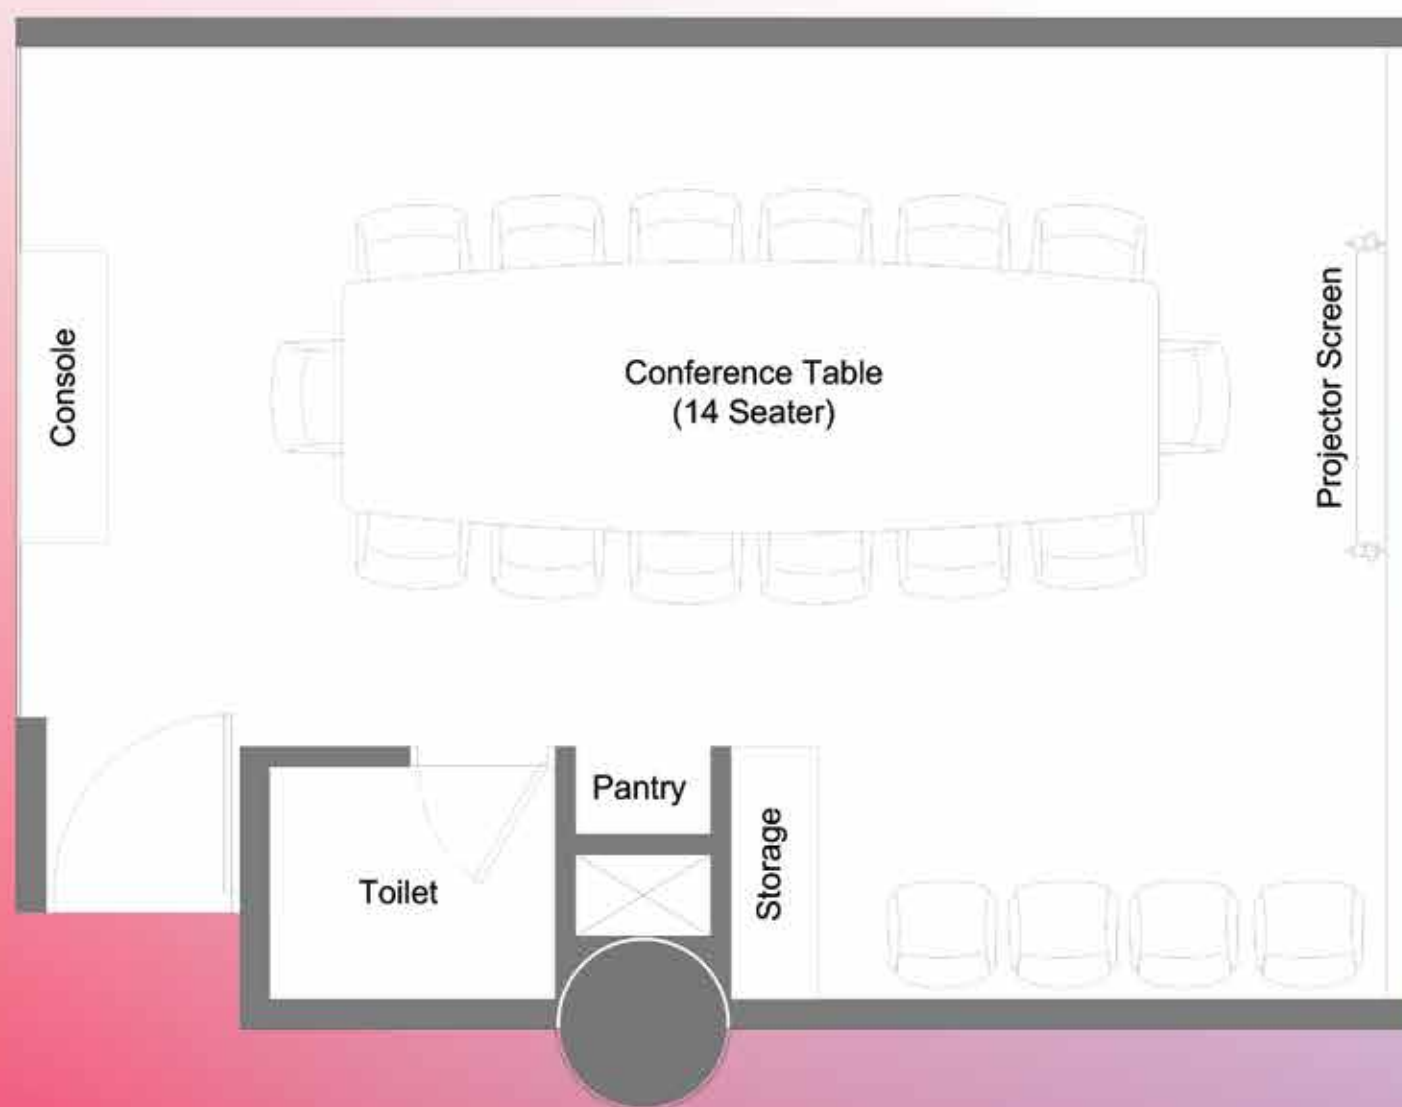

Start a studio suited for shoots, editing, and equipment setup. The space accommodates subject, crew members, along with an editing area for editors and equipment storage. Suitable for photography, content creation, and commercial shoots.

CONFERENCE ROOM

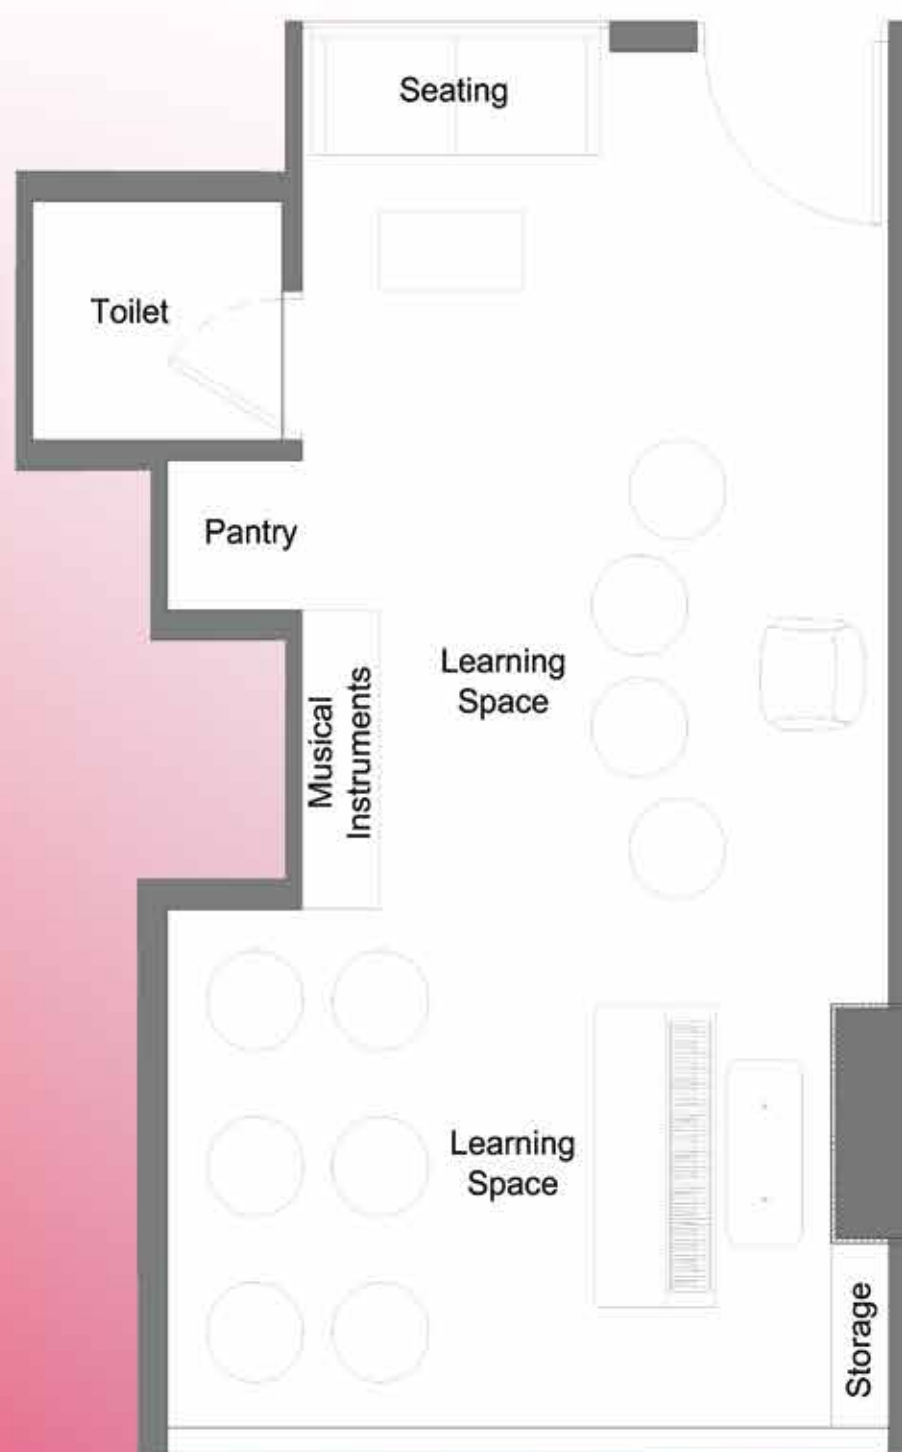

Set up a meeting room with space for discussions, presentations, and brainstorming. A formal meeting space with a 14-seater conference table and additional seating for attendees.

MUSIC STUDIO

Designed for group learning or practice with seating for students and an instructor, along with space for instruments and storage. Suitable for training and practice sessions.

DIAGNOSTICS CENTRE

Start a diagnostic facility close to residents for better access. The space features a waiting area for patients, a doctor's cabin, and an examination room for diagnostic procedures.

DANCE-ZUMBA STUDIO

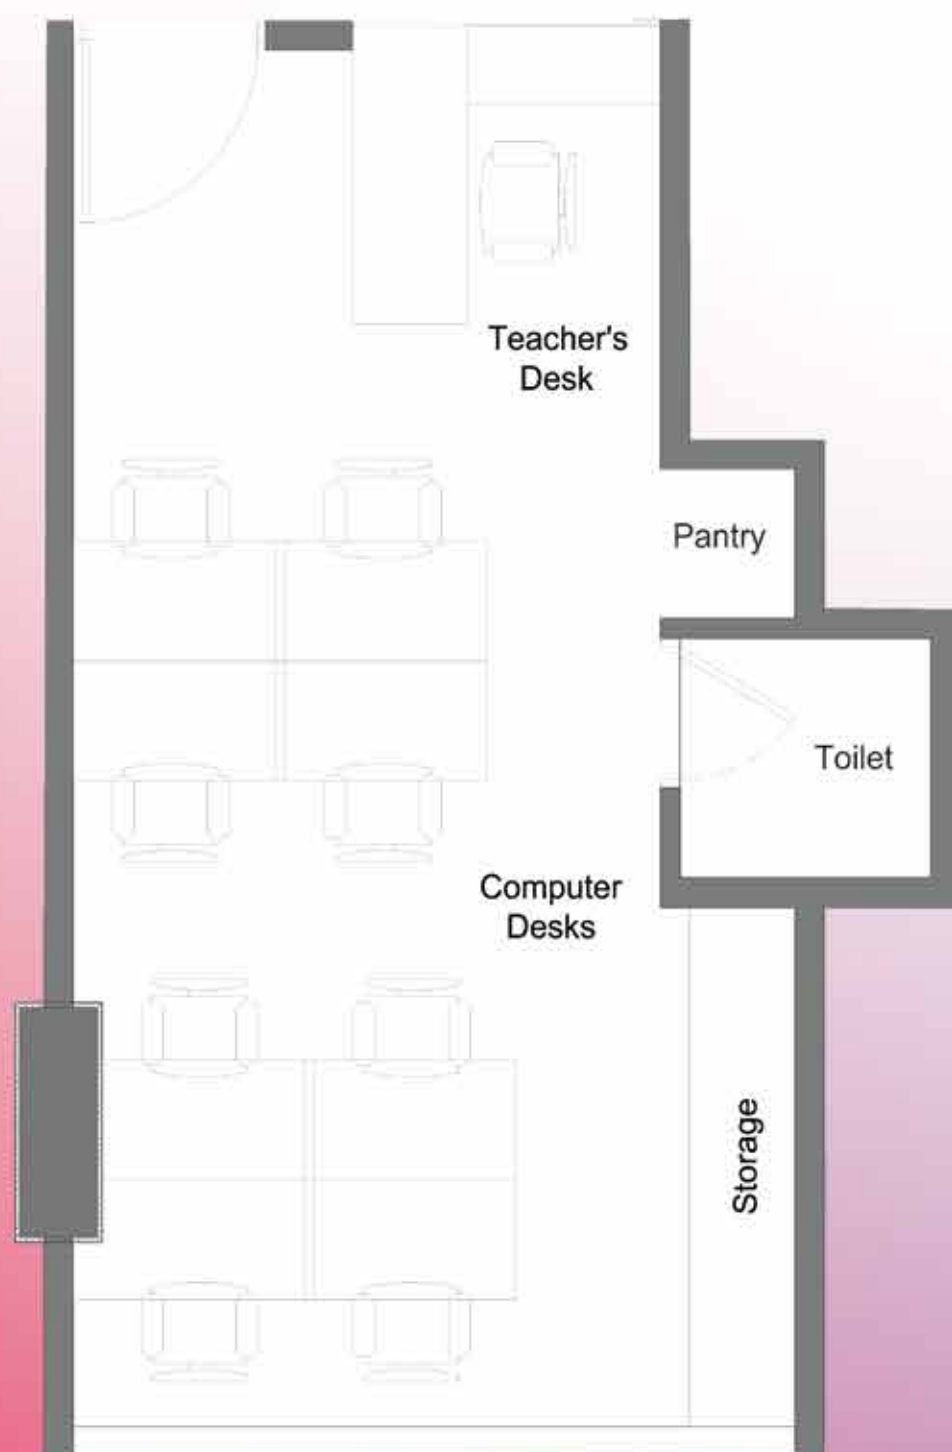

An open activity space accommodating ample participants per batch, supported by mirrors, seating, and lockers. Suitable for dance, fitness, and group workout sessions.

COMPUTER CLASSES

Create a training centre for computer learning. The layout supports training setup with computer stations and a teacher's desk. Suitable for structured learning, certification programs, and skill-based training.

PATHOLOGY LAB

Set up a lab in a well-connected area to serve the community. The space supports a compact lab layout with waiting space for patients and a sample collection area handling multiple patients at a time.
